

# How to Setup Market Center Printers - Applies to ALL Rawls Group Locations

Agents may install the office printers onto their own personal laptop or desktops. These enterprise level, full featured multi-function devices are regulated by assigning a unique billing code to each individual Agent. If you do not know your code, please contact your Agent Service Coordinator assigned to your Rawls Group Market Center. For pricing information per black & white and/or color print, please contact your Agent Service Coordinator.

All copier printers within the Rawls Group Market Centers are compatible for Windows and Mac OSx. Agents may install the printers on their own by following the directions linked above. Alternatively, Agents may book a **Remote Technology Session** to have this task performed for you.

*NOTE: Mac users who need the Black & White HP printers in the **Peachtree Road Market Center** installed, will need to be at the office and joined to the network during the time of printer installation. Windows users can be joined to any network or even be offline during the printer installation.*
