

BC372 - Douglasville - Printer Installation (Mac)

KWSV - BC372 - Printers Quick Guide		
Device	IP Address	Driver
KW_Douglasville	192.168.50.24	SAVIN MP C2503
Driver Bundle KW_Douglasville.pkg		

1. Please download the file from the table above. This is the driver for KW_Douglasville.
2. Once downloaded, find it in your Downloads folder on your Mac (Click on Finder, then Downloads).
3. Double click on the **KW_Douglasville.pkg** file and follow the prompts to install the printer driver.
4. Once installed click on **System Preferences**. Click on **Printers & Scanners**.
5. Click on the + sign in the bottom left corner of that window and then click on IP (3rd tab up top).
6. In the **Address** field type in 192.168.50.24, change/leave **Protocol** to **Line Printer Daemon - LPD** and leave **Queue** blank.

Address:

Enter host name or IP address.

Protocol:

Queue:

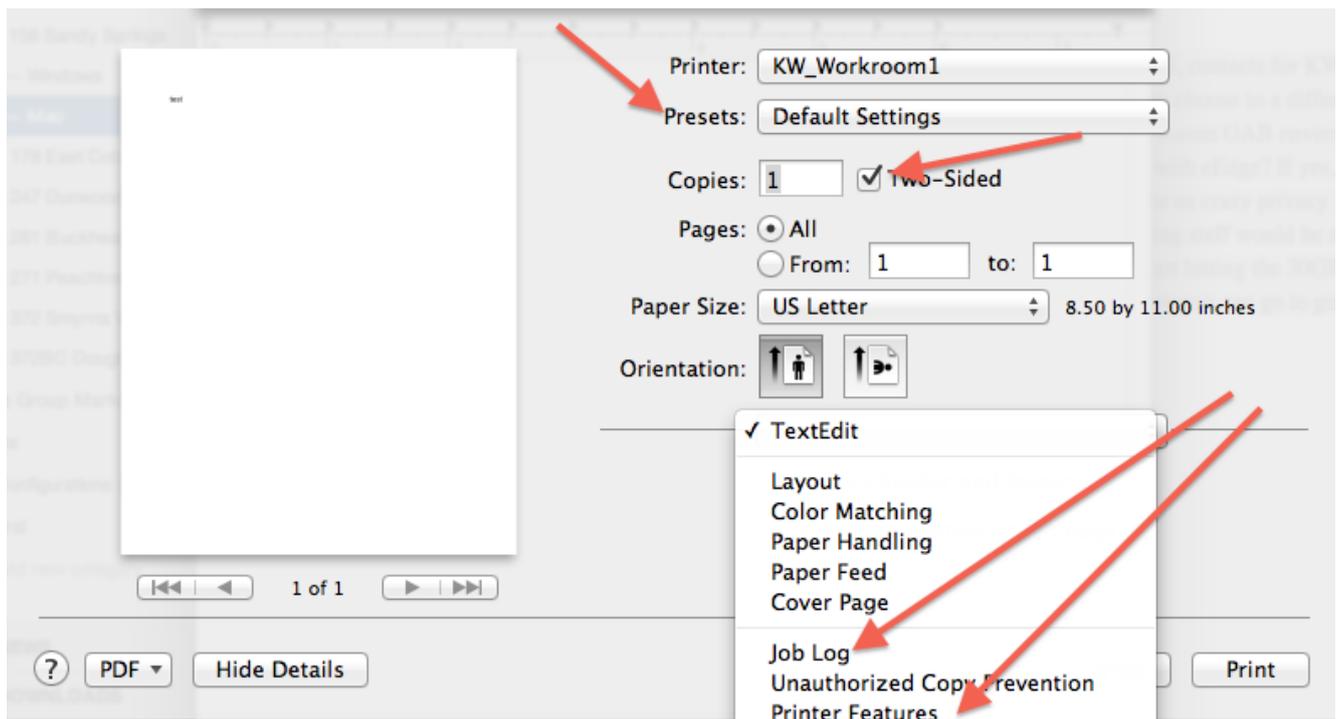

Leave blank for default queue.

Name:

Location:

Use:

7. Once the printer is found change the **Name** field to **KW_Douglasville**, **Location** field is optional (could be something like **KW office**). Make sure under **Use** field the driver ends in **PS**, eg. **Savin MP C2503 PS**. This is crucial, if it says **AirPrint**, change it to the **PS** driver. Click on **Add**. On the next page click on **Next** and it should be installed.
8. Once installed launch any program (TextEdit would do but do **NOT** use **Chrome** or **Adobe Reader**) and select **File, Print**. This will invoke the print dialog.
9. See attached photo and make the following changes following the instructions **BELOW** the picture.

- 9.1. Click on **Printer** and select **KW_Douglasville**, remove the checkmark for **Two-sided** printing. (well, if you prefer two-sided, by all means keep it).
- 9.2. Click on the "**TextEdit**" menu (in this example TextEdit, could be Firefox, Safari, Word, etc) below **Orientation** and select **Job Log**, put a checkmark next to **Enable User Code** and then enter your office **Print code**. Ask your Agent Services Coordinator what your code is if you do not know it.
- 9.3. Click on **Job Log** below **Orientation** and select **Printer Features**. Now click on **Presets** at the top and choose **Save Current Settings as a Preset**. Name the **Preset - Color**. Now change the **Color Mode** at the bottom (2nd from bottom) to **Black and White**. Click on **Presets** again and select the same **Save Current Settings as a Preset**. This time name the **Preset - BW**.

Going forward make sure to **Always** select **BW** or **Color** preset to print, otherwise it will not print. The presets have the color selection and, most importantly, your print code.
